## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ozaki et al.

The patent to Ozaki et al. discloses a slot machine 15, Fig. 19, comprising rotatable reels 2a, Fig. 28. The slot machine further comprises a transparent liquid crystal display panel 24 disposed in front of the rotatable reels. A liquid crystal display holder 6, Fig. 17 holds the display panel, see paragraph [0138] which recites that an LCD device may be substituted for the EL panel 5. A light guiding plate 25 for guiding light emitted from a light source 26 to the rear of the liquid crystal display panel. The reflecting plate helps diffuse light from the light source to illuminate the liquid crystal display panel. A back base frame 11, Fig. 19, attached in front of the machine supports the liquid crystal holder, light guiding plate, and diffusion means. The front of the display unit of the liquid crystal display panel has an opening 6a, Fig. 17, and it is inherent to provide transparent or glass plate in front of the base unit for closing the opening. A rear holder 100, Fig. 19 holds the liquid crystal holder, light guiding plate, and diffusion means. The rear holder further comprises a window 2 allowing the symbols of the rotatable reels to be observed.

Art Unit: 3711

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Loose et al., Manship et al., Tadao, and Aida et al. disclose slot machines having rotatable reels, and liquid crystal display panels mounted in front of the reels. The two Japanese patents to Taku disclose slot machines having rotatable reels, and LED or EL panels mounted in front of the reels.
